## About Fairview

Fairview opened on January 5, 1959, and is the newest of all of the state-operated developmental centers. Fairview is a multi-service residential facility licensed to provide acute, skilled, and intermediate care to individuals with developmental disabilities who need 24-hour health care supervision, a structured environment, and a habilitation program not currently available in their home community. Since the people who live at Fairview have strengths and weaknesses like the rest of us, services include training in daily living, vocational, leisure, academic, communication, mobility, socialization, and community integration skills. Our clients are provided opportunities to grow, express themselves and achieve independence.
